Title : Microsoft Dynamics AX 2012 Process Manufacturing Production and Logistics

Version : Demo

1.Which of the following is a characteristic of a bill of materials (BOM) item in Microsoft Dynamics AX 2012?
A. produced in a batch size
B. produced together with a by-product
C. can contain a catch weight ingredient
D. a fixed quantity of components produces only an output of one unit
Answer: D

2.You are applying a product template to an existing released product in Microsoft Dynamics AX 2012. Which of the following parameters must be identical between the product template and the released product.? (Each correct answer presents a complete solution. Choose three.)
A. configuration technology
B. item model group
C. product model group
D. product subtype
E. product type
Answer: ADE

3.Which dimension can be created only at the enterprise level in Microsoft Dynamics AX 2012?
A. site
B. size
C. warehouse
D. batch number
Answer: B

4.Which of the following manufacturing requirements does process manufacturing address?
A. batch production
B. contract manufacturing
C. engineer to order
D. Lean manufacturing
Answer: A

5.Which of the following characteristics apply only to a formula item and NOT to a bill of materials (BOM) item?
A. Default order settings apply to the item.
B. The item must have the serial tracking dimension.
C. The item must be defined at the organization level.
D. The production of the item can result in the production of co-products.
Answer: D

6.An item in a production batch must be retested in 30 days to validate that it meets standards.
You need to generate a report that informs you to retest the production batch in 30 days.
What should you do?
A. Set the Shelf life period in days to 30.

B. Set the Best before period in days to 30.
C. Set the Shelf advice period in days to 30.
D. Set the Expiration date to 30 days from the manufacturing date.
Answer: C

7.You need to set up consolidated batch orders to link a bulk order to packed orders.
Which of the following actions is part of the setup process?
A. Define the bulk item conversion for BOM items.
B. Define the bulk item conversion for formula items.
C. Define the bulk item conversion for by-product items.
D. Define the bulk item conversion for planning item items.
Answer: B

8.For which of the following production types can you define a planning formula in Microsoft Dynamics AX 2012?
A. by-product
B. co-product
C. formula
D. planning item
Answer: B

9.In which of the following groups can you configure reservation-related settings provided by the Microsoft Dynamics AX 2012 process manufacturing features?
A. coverage group
B. item group
C. item model group
D. product dimension group
Answer: C

10.Which of the following template item properties will transfer to a new item that has been created by using a product template? (Each correct answer presents a complete solution. Choose three.)
A. approved vendor list (AVL) check method
B. catch weight unit
C. shelf-life period in days
D. yield percent
Answer: ACD

11.For which of the following production types can you allocate the total cost of a batch order in Microsoft Dynamics AX 2012? (Each correct answer presents a complete solution. Choose two.)
A. by-product
B. co-product
C. formula
D. planning item
Answer: BC

12.To which of the following logistic processes can a formula version be assigned? (Each correct answer is a complete solution. Choose two).
A. manufacturing
B. master planning
C. route consumption
D. transfer orders
Answer: AB

13.You need to explode and consume the ingredients of a formula item in a batch process.
In the Formula line form, which line type should you use for the formula item?
A. item
B. pegged supply
C. phantom
D. vendor
Answer: C

14.Which of the following statements about formula versions in Microsoft Dynamics AX 2012 are true? (Each correct answer presents a complete solution. Choose two.)
A. Formula versions require a default site.
B. Formula versions allow specification of yield.
C. Formula versions require a route association.
D. Formula versions can be defined for a quantity greater than one.
Answer: BD

15.The formula for a finished good named FG-01 uses a raw material named RM-01. You currently have a supply of RM-01 in stock. The vendor informs you that only limited supplies of RM-01 will be available in the future. After you run out of the current supply of RM-01, you will substitute a raw material named RM-02 in the FG-01 formula.
Which of the following options must you configure on a formula line to allow raw material substitutions in Microsoft Dynamics AX 2012?
A. Step consumption
B. Percent and Priority
C. Plan group and Priority
D. Scalable and Percent controlled
Answer: C
